

**Effects of Norwegian Vocational Rehabilitation Programs:
Improving Employability and Preventing Disability?**

Lars Westlie

Complete estimation results for the model reported in the paper

This is a downloadable appendix to the paper “Effects of Norwegian Vocational Rehabilitation Programs”. The following table presents the complete estimation results of the model presented in the paper. Complete variable description is provided in a separate downloadable file. The numbers at the end of each variable indicate the event (destination) in question: employment (_1), disability pension (_2), temporary withdrawals (_3), WTO (_4), WTP (_5) AMO (_6) EDU (_7) and WS (_8).
